ARCHWAY

sheet metal works

“The life so short... The craft so long to learn”

ARCHWAY SHEET METAL WORKS

- Catering Equipment Manufacturers
- Ventilation Engineers
- Stainless Steel Fabricators
- Gates, Railings & Staircase Craftsmen
- Gas Safe Engineers

Sheet Metal: Metal in the form of a sheet, the thickness being intermediate between that of a foil & that of a plate. Sheet Metal is used in the craft of the manufacture of utilities and machinery.

Craftsmanship: The skill of precision engineering, which in the current market climate is somewhat rare and therefore a value added concept of quality and distinction, conveying a standard of excellence.

Family Business: An exclusively family run commercial organisation, established almost half a century ago, with an emphasis on exceptional service and quality.

All three elements are the constituents of Archways makeup. These are the values on which this business was established almost 50 years ago. Futhermore, these are the ethics that projected Archway into the premiere league of sheet metal manufacture, whilst maintaining a modern outlook to remain ahead in a competitive field by providing the necessary innovation required in the market place.

Sheet metal is not all about industrial creations but in terms of Archway, should rather be viewed as creativity in combination with craftsmanship. Archway is a business that benefits from a pedigree unsurpassed. Dedicated to a youthful outlook needed to be the first port of call for London's hospitality industry.

Content

Page No

Doner Kebab Grills

4 - 7

- Two burner, three burner, four burner, five burner, twin models, compact models, thermofast models, electric doner cutter / slicer.

Charcoal Grills
